

## **Pediatric Ophthalmology and Strabismus**

And now, a “Medical Minute” from Mass. Eye and Ear.

Hello, I am Dr. Melanie Kazlas, acting Director of Pediatric Ophthalmology and Strabismus at the Massachusetts Eye and Ear Infirmary. The Pediatric Ophthalmology and Strabismus service at Mass. Eye and Ear provides comprehensive primary care for the diagnosis and management of infant and child vision, and common childhood vision disorders. We also perform surgery to correct ocular misalignment and double vision. Common childhood vision disorders include nearsightedness, farsightedness, amblyopia, or lazy eye, and strabismus, or crossed eyes. Annual eye screenings help identify children who need a full eye exam with an ophthalmologist. Mass. Eye and Ear provides expert pediatric care in a child-friendly environment. For more information call 617-573-3048, or visit us online at [masseyeandear.org](http://masseyeandear.org).
