

And now; a medical minute from Mass. Eye and Ear.

Hello, I am Dr. Roberto Pineda, Director of the Laser Vision Correction Center at the Massachusetts Eye and Ear Infirmary. Laser Vision Correction is a term given to surgical procedures designed to correct certain vision problems such as nearsightedness, farsightedness, and astigmatism. At Mass. Eye and Ear, these outpatient procedures utilize the Allegretto Wave Eye-Q Excimer Laser to help reshape the cornea. For more than a decade, the physician at Mass. Eye and Ear have performed thousands of laser vision correction procedures utilizing the most advanced technology available. If you have been wearing glasses or contact lenses and are now considering laser vision correction, you can feel confident that the physicians at Mass. Eye and Ear offer unmatched experience and the latest techniques of one of the country's leading specialty hospitals. For more information call 617-573-3234, or visit our website at masseyeandear.org.
